DETAILED ACTION

Allowable Subject Matter

1. Claims 1-9 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claim 1 recites, inter alia, error calculation means configured to calculate an error output between the ideal control signal generated by the control signal generation means and an actual control signal which switches on the main switch; and delay control means configured to control a delay of an ON time of the main switch by the actual control signal based on the error output of the error calculation means, thereby performing control to make the actual control signal approach the ideal control signal.

Claim 2 recites, inter alia, error calculation means configured to calculate an error output between the ideal control signal generated by the control signal generation means and an actual control signal which switches on the main switch; and delay control means configured to control a delay of an ON time of the main switch by the actual control signal based on the error output of the error calculation means, thereby performing control to make the actual control signal approach the ideal control signal.

The art of record does not disclose the above limitations, nor would it be obvious to modify the art of record so as to include either of the above limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
